

One person is telling the truth, the other 3 are lying. Pick the door that will correctly lead you to the gate of the evil lair.

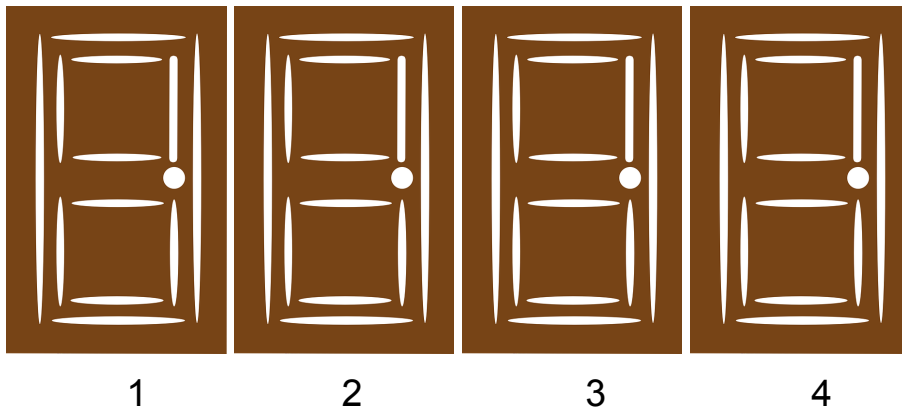

Person 1: don't go through the first or fourth door, or you will be attacked!

Person 2: You will find the evil lair either behind the first or last door

Person 3: door 3 will lead you to the evil lair

Person 4: There's a hungry bear behind the second door

Which door should you choose?

You and your fellow spies have made it to the gate of the evil guy's lair. In order to get in, you have to give the guard a numerical code. You ask the guard for a hint, so he gives you this riddle:

8,13, 21, 34, \_\_

Final code

**\_**

(door #, gate code)
